PROFESSIONAL CREDENTIALS

EUR ING (2ND CYCLE) Member n° 34842 of FEANI – European Federation of National Engineering Associations (2022)

Member of the Portuguese Order of Engineers (O.E.) since 20-11-1986, Registration n°: 20900

Portuguese Chartered Counselling Engineer (*Membro Conselheiro*, the highest grade) entitled by the O.E. (2021)

Specialist Engineer in Structural Engineering entitled by the O.E. (2010)

Specialist Engineer in Engineering Appraisal entitled by the O.E. (2020)

Member of EdF – Portuguese Association of Façade Engineering (Associação Portuguesa de Engenharia de Fachadas, <https://engfachadas.pt>)

EDUCATIONAL QUALIFICATIONS

Academic Titles and Degrees

University of Porto © U.Porto

Aggregation (Habilitation) in Civil Engineering June 2010

PhD in Civil Engineering 2000–2004

Thesis: “*Structural and Economic Performance of Beam-And-Block Pre-Tensioned Slabs*”

Pre-Bologna Master’s degree in Building Construction 1989–1991

(two-year study cycle requiring five-year previous degree) and a Dissertation

Dissertation: “*Prestressed Slabs with Unbonded Tendons (A guide for Structural Design and Project Detail)*” (available online:

Pre-Bologna Degree in Civil Engineering 1981–1986

(Five-year study cycle known as Licentiate)

Polytechnic of Maputo (Lourenço Marques – Mozambique)

(Former Portuguese Colony Capital)

Bachelor in Civil Construction 1973–1976

(Pre-Bologna three-year study cycle known as Bachelor)

Specialization Courses

Quality Management in Construction and Real Estate Appraisal, University of Salford, Institute of Technology for the European Community (ITEC), Lisbon, 1994.

Principles and Specifications of Rainscreen, University of Bath, Centre for Window and Cladding Technology, UK, 2005.

Finite Elements with MATLAB, Faculty of Engineering of University of Porto, 2008.

Curriculum Development Overview

He began his professional activity in 1976 as a trainee Technical Engineer in the Urbanization Office of Lourenço Marques (Mozambique), under the guidance of the architects João José Tinoco and Octavio Rego Costa, as a reinforced concrete designer and adjunct construction surveyor.

In 1977, he joined as Deputy Director of Works of Banco Nacional Ultramarino, carrying out activities to supervise the works of the bank's new head office buildings under the guidance of Eng. Álvaro M.B. Pereira Forjaz. In 1979, he assumed the role of Technical Director with increased responsibilities in the Management of the Bank Real Estate.

In Portugal, since 1982, he worked as a structural designer of reinforced concrete structures as a liberal professional.

In 1986, he began his duties as a technical assistant integrating the internal team of the Public Bank Caixa Geral de Depósitos (CGD), continuing his technical career as Technical Assistant and later as Technical Consultant Engineer. In this Institution, he begins in the activity of Evaluation and Analysis of Real Estate Investment Projects as well as in the supervision and monitoring of works.

Between 1983 and 2000, alongside his activity as a designer, he carried out hundreds of studies for the Administration of Caixa Geral de Depósitos (CGD) as a consultant and analyst of large-scale real estate investments.

In 1987, he began his scientific activity in the field of Structural Engineering under the tutorship of Professor Manuel de Azeredo e Mello at the Faculty of Engineering of University of Porto in Portugal (FEUP). At the end of 1988, he became interested in unbonded prestressing concrete. Under his guidance, he completed his pre-Bologna Master's Thesis in 1990, having carried out an exhaustive study on non-adherent mono-strand internal prestressing systems.

In 1997, under the guidance of Prof. Manuel de Azeredo, he continued his studies to obtain a doctorate in the field of structural reliability, having interrupted his work at the end of 1999.

In 2000, he resumed his PhD with Prof. Serra Neves, studying transversally the systems of lightweight beam-and-block slabs with Pre-tensioned Beams, where he developed a Theory for determining the Economic Efficiency of prefabricated beam-and-block floor systems.

Also, under his doctorate thesis he also presented a new approach for checking the cracking limit state for prestressed elements which is published in the "Structural Concrete Journal of the FIB" with the title "Limit States of Cracking in Beam-and-Block Floor Systems using Pre-tensioned Ribs".

In this context, he developed research on prestressing wire anchorage, presenting formulations for its design work that is published in the Structures & Buildings Journal of the ICE-Institution of Civil Engineers under the title of: "Headed Wires in Concrete Connections".

In 2000, he began his applied research work, coordinating consultancy activities at the Faculty of Engineering of University of Porto in Portugal (FEUP) and as Adjunct Professor at ISEP –

School of Engineering, today of the Technical University of Porto (UTP; until 2026 the Polytechnic Institute of Porto).

In 2004, he began his studies on the behaviour of mechanical fixing systems for natural stone slabs using anchors. The result of part of this work is published in different editions of the ICE Journal “Construction Materials” with the titles: “Dimension Stone Cladding Design with Dowel Anchorage” and “Dimension Stone Design - Kerf Anchorage in Limestone and Marble” and “Undercut anchorage in dimension stone cladding”.

In 2007, he coordinated the Scientific Commission “Structural Safety and Concrete Structures” as part of an International Project, financed by the World Bank, to assist the Civil Engineering Laboratory of Cape Verde.

At the beginning of 2009, he coordinated the development of a prototype for facade panels in prestressed natural stone, which has been on the market since the end of 2012.

Trainer recognized in 2006 by the CMVM Securities Market Commission for Real Estate Appraisal Courses.

Between 2006 and 2014, he coordinated the Specialization and Real Estate Appraisal and Investment Analysis Courses at IDT - Instituto para Desenvolvimento Tecnológico do Porto.

Between 2006 and 2014, he supervised several conclusion works of the IDT Course in Real Estate Appraisal.

Between 2006 and 2014, he Published several educational articles in the field of Real Estate Investment Analysis, namely with regard to “*Deterministic Analysis of Real Estate Investments*” and “*Probabilistic Analysis of Real Estate Investments*”.

Between 2016 and 2018, he is Regent of the Course Units of the Postgraduate Course in Real Estate Appraisal at ISEP – School of Engineering, Technical University of Porto: “Financial Mathematics”; “Mixed Method”; “Real Estate Investment Analysis”; “Land Assessment”; “Real Estate Appraisal - Lease or Acquisition”.

Between 2018 and 2019, he published the articles “A Dynamic Approach to the Cost Method in Real Estate Appraisal” and “Real estate and matrix analysis” in the Journal of Finance and Investment Analysis.

He published in the proceedings of the 2018 Construction Congress in Porto the article: “Real Estate Appraisal Cost Method – Pseudo-Dynamic Approach”

He published the article “Risk Analysis and Management of Real Estate Enterprises”. Caixa Geral de Depósitos, Lisbon 1992.

“*Statistical Methods applied to Real Estate Appraisal*”; Caixa Geral de Depósitos, Lisbon 1993.

“*Simulation in the Analysis of Investment in Real Estate Projects*”, 1st Congress of the Portuguese Association of Engineering Assessments (APAE), Lisbon.

“*Application of Simulation Techniques in the Analysis of Financing and Investment in Real Estate Undertakings*”, edition of the Ordem dos Engenheiros, April 1997, Lisbon.

“*Real Estate Appraisal and Investment Analysis*”, edition of ITEC and the University of Salford, of the Advanced European Course on Construction and Real Estate Management, Lisbon, 1994.

“*Real Estate Appraisal and Construction Financing*”, published in the Portuguese Magazine of Construction Materials.

“*Application of the Simulation Techniques in Finance and Investment Analysis to Real Estate Enterprises*” edition of the World Housing Congress, organized by I.A.H.S, Porto.

1993 “*Real Estate Appraisal and Construction Financing*” Meeting - Construction Policy, Porto - FEUP.

In 2021 he published, as editor and co-author, the 680-page book “*Avaliação Imobiliária*” (Real Estate Appraisal), Porto, and in 2025 the book “*Engenharia de Investimentos Imobiliários*” (Real Estate Investment Engineering), Porto.

From 2011 he chaired several Assessment Committees of Study Cycles in Civil Engineering of A3ES – the Portuguese Agency for Assessment and Accreditation of Higher Education (each assessment committee, set up for one study cycle, has its own chair).

From October 2012 to April 2013, Visiting Professor (sabbatical leave) at The University of Queensland, Australia; in the 2nd semester of 2014, Visiting Professor at the Warsaw University of Technology.

Since March 2020, retired (*jubilado*) Coordinating Professor with Habilitation of ISEP – Technical University of Porto; since 2022 working exclusively as an independent professional – structural and façade designer, consultant, court-appointed expert and real estate appraiser.

PROFESSIONAL EXPERIENCE

(1976) Urban Development Department of Lourenço Marques

Internship at the Urban Development Department of Lourenço Marques (Maputo), where duties covered Structures and Hydraulics.

Projects for urban water supply networks.

Projects for reinforced concrete structures for residential buildings.

Inspection of state works, particularly the construction of Schools and Health Centres in the outlying areas of the city of Maputo (Lourenço Marques).

(1977 – 1981) Banco Nacional Ultramarino in Mozambique

Deputy Technical Director (1977–1981). Tender Coordination, Promotion and Inspection Management of contract works for the construction of New Buildings for the bank’s head office in Lourenço Marques (14 floors) and branch offices in Nacala (13 floors) and Tete (11 floors) for Banco Nacional Ultramarino in Mozambique.

Management of the maintenance of the BNU real estate portfolio in Mozambique.

Technical Management and Inspection of the construction contract works for the 22-storey tower at Praça Vasco da Gama, downtown Maputo, begun in 1974 as the new head office of BCCI – Banco de Crédito Comercial e Industrial (then a subsidiary of Borges & Irmão) and, after nationalisation, assigned to the commercial services of Banco de Moçambique.

Responsible for preparations and for the bank’s Comprehensive Maintenance Project for Real Estate Assets (PGMPI).

Caixa Geral de Depósitos (Portugal)

(1983 – 2000)

Preparation of studies and opinions on large Investments in Civil Construction and Public Works.

Real Estate Appraisal for Mortgage Guarantees, to finance Civil Construction Companies and Public Works.

Risk and Profitability Analysis for Civil Construction Investments.

Application of RAMP (Risk Analysis and Management of Projects) techniques in Civil Engineering.

Benefit Analysis – Cost in Civil Engineering projects.

Follow-up and inspection of financed works.

Evaluation of mortgage guarantees; appraisal of properties for future CGD premises; appraisal of dwellings (houses and apartments) for mortgage lending.

Design, realisation, and implementation of specific computer applications for the said activities.

Independent Professional (1982-Present)

Project for the 26-metre underground tunnel for heavy vehicle traffic under a road for the same type of vehicles for the company Reguladora SA.

Project for the water reservoir with a capacity of 150 m³, for the company Reguladora, SA.

Project for heavy prefabrication systems consisting of prestressed parts by pre-tensioning for the roofs of large-span industrial bays and the building of road viaducts for the company Telhabel, SA.

Reinforced and prestressed concrete structures designer for various buildings, with emphasis on buildings between 12 and 15 floors in Braga - Portugal.

Designer of water and air pressure vessels for high pressures.

Forensic Engineer reporting to several Judicial Courts in Portugal: studies on building pathologies with expert reports for the Courts of Guimarães and Braga; expert in damage analysis and structural rehabilitation; expert appointed by the Court of Póvoa de Varzim – structural analysis of a 19th-century building; expert appointed by the Court of Santa Maria da Feira – structural analysis of a factory after fire; expert appointed by the Court of Porto – structural analysis of a 19th-century historic building in Rua dos Clérigos.

CCAD Engineering Services Lda (2020–2025) – Consulting engineer and structural designer for several industrial buildings, pedestrian bridges and prestressed medium span bridges.

AuGWIND (Israel, 2021) – Structural designer of storage structures for high-pressure vessels.

ACA (2024–2025) – Consultant and structural designer of façade structures: mechanically fixed (clip-anchored) natural stone façade systems.

Real estate and infrastructure appraiser and investment analyst; appraisal and economic analysis of the museological rehabilitation of the former 19th-century water intake station of Foz do Sousa supplying the City of Porto (2025).

Team Coordinator for preparing the design/construction proposal of Conduril Lda for the CCF Glazed Facades (Closed Cavity Facade) for the New Permanent Office Building At The Palais Des Nations In Geneve. The proposal, presented in 2017, included solutions, detailing and dimensioning for the following aspects according to the requirements of the developer including:

The structural safety of the aluminium and wooden elements of the CCF panel structure; Safety of the triple-glazed panels; The Verification of the effects of vibration induced by vortices by the parallel wind; The Verification of the vibration limit state of the slender panels; Safety verification of global and localized buckling; The Verification of the safety of the outer sheets in laminated glass; Determination of the tension installed in the structural silicones for sealing the CCF panels; Electronic control of the isochoric pressure of the panels; Analysis of the risk of condensation; Study of acoustic behaviour; Design of laboratory tests for air and water tightness;

Impact resistance tests and Fire resistance tests.

Monitoring on-site construction processes, tracking, and reporting on project progress.

RESEARCH AND DEVELOPMENT ACTIVITIES

Faculty of Engineering of University of Porto – Portugal (FEUP)

Assistant Researcher 1997–1998

Under the guidance of Professor Manuel de Azeredo, he carried out works in the area of “Structural Reliability Using Computational Methods”. The models were developed upon the Monte Carlo Method aiming to study the calibration of failure probabilities of structural elements in reinforced concrete subjected to simple bending.

Laboratory of Concrete Technology and Structural Behavior - FEUP Porto

Assistant Researcher 1999–2000

He developed works on “Verification of Cracking Limit States in Pre-Stressed Concrete”. He presents, as the main author, an alternative formulation more accurate than the traditional ones whose foundations and applications were published in the Structural Concrete Journal of the FIB with the title: “Limit States of Cracking in Beam-and-Block Floor Systems Using Pre-tensioned Ribs”

GICEC – “Research and Consultancy Group in Civil Engineering of ISEP” – ISEP, School of Engineering, Technical University of Porto.

Founding member (2007-2015)

GICEC has been focussing its R&D activities on 3 fundamental aspects:

Façade Engineering – study and development of new systems.

Management of Construction/Planning of Projects in the Construction Industry with Limited Resources.

Rehabilitation and Reinforcement of Building Heritage – Characterisation of Structural Materials; Inspection of Structures; Identification of Pathologies; Reinforcement Solutions; Structural Behavioural Analysis.

Laboratory of Concrete Technology and Structural Behavior - FEUP Porto

Assistant Investigator 2000–2002

He developed applied research in the area of prestressing wire lashings with end devices. From the results of the corresponding tests, he analytically studied values of partial safety factors to be applied in this type of lashings. He enunciated formulations for the dimensioning of this type of mooring. The results and conclusions of this research work gave rise to articles such as Structures & Buildings ICE - Institution of Civil Engineers with the title: “Headed Wires in Concrete Connections” stands out.

FEUP Center for Construction Studies - Porto

Principal Investigator 2004–2006

He developed studies on the behaviour of mechanical fixing systems for natural stone slabs using anchors. The result of this work is published in several articles in the Journal of ICE Construction Materials with the title: “Dimension Stone Cladding Design with Dowel Anchorage”, and “Dimension Stone design - Kerf Anchorage in Limestone and Marble” among others.

ISEP Civil Engineering Research Group.

Structural Standards International Committee Coordinator 2006–2008

He coordinated the scientific committee - Structural Safety and Concrete Structures as part of the International Project, financed by the World Bank, for Technical Assistance to the Civil Engineering Laboratory of Cape Verde. The commission was responsible for drafting legislation to be approved in the Republic of Cape Verde for the following regulations in that country: RASE - Regulation of Actions and Structural Security; RBE - Structural Concrete Regulation.

ISEP Civil Engineering Research Group – Porto.

Technology Research and Development Project Coordinator

Project coordinator Presstone©- research and development project, in a consortium and financed by ADI (QREN) in the amount of €413 000, to develop a prototype for facades in prestressed natural stone. Including several dozen full-scale tests, a method of applying to prestress wires with no initial losses and easy calibration was developed, suitable for the case of short length rods, the result of this work has been published in several articles where the from the International Journal of Sustainable Materials and Structural Systems with the title: “Structural Performance of Prestressed Façade Limestone Panels” among others.

FEUP Centre for Construction Studies - Porto

Principal Investigator 2010–2012

Project coordinator on the study of glazed panels under the effect of seismic action on facades. Part of the result of this work has been published in several articles where the following stand out: “Seismic Behavior of Point Supported Glass Panels” - Challenging Glass - International conference on the Architectural and Structural Applications of Glass, 2012, TU Delft, The Netherlands and “Spider Glass Behavior Under Seismic Action” - 15WCEE - World Conference on Earthquake Engineering, September 2012, Lisbon- Portugal.

LABEST – Laboratory of Concrete Technology and Structural Behaviour - FEUP Porto

Founding member 2003-2008

R&D unit that integrates the network of research units qualified by the Foundation for Science and Technology (FCT).

Participation in the design and performance of advanced construction and repair materials, including Self Compacting Concrete (SCC), Fibre Reinforced Concrete (FRC) and Ultra High-Performance Fibre Reinforced Concrete (UHPFRC). Valorisation of industrial by-products and recycled aggregates in concrete. Structural Health Monitoring (SHM). Advanced numerical modeling of reinforced concrete (RC) structures. Structural safety and service life assessment of RC structures

Simulation of RC structures since the onset of cement hydration, including the prediction of cracking due to restraints to the free deformations of concrete.

Construct - FEUP Porto

Integrated Member 2008-2020

R&D unit that integrates the network of research units qualified by the Foundation for Science and Technology (FCT).

Participation in experimental and numerical studies of structures, structural components and constructive systems to characterize their behaviour under actions of dynamic nature, seismic in particular, and static studies for characterization, assessment and mitigation of seismic risk in buildings and in transport and energy infrastructures.

Survey, diagnostics, and field tests, including monitoring of existing structures, particularly built historical heritage structures, to support possible interventions of rehabilitation and conservation

Experimental and numerical studies for characterizing the short- and long-term dynamic behaviour of the railway infrastructure (bridges, track, transition zones)

ISEP Scientific-Technical Council Member 2009-2011

A3ES - Higher Education Assessment Agency

Intellectual And Industrial Property Patents Author

Class International: E04C 2/02 (2006.01) Lisbon

Inventor - National Invention Patent 104800 2010

Autonomous Self-Pressurization System Reactive to Rain and Temperature Control in Facades of 07/04/2010

Class International: E04C 2/00 (2006.01) Lisbon

Inventor - National Invention Patent 104770 2010

Prestressed Panels made from natural stone slabs and steel rods from 05/17/2010

SUPPORT ACTIVITIES FOR HIGHER EDUCATION

Assessment Team Member, University and Polytechnic Higher Education 2010-2011

Committee for the Evaluation of Study Cycles in Civil Engineering

Chair of several Assessment Committees of Study Cycles in Civil Engineering 2011-2021

A3ES – Agency for Assessment and Accreditation of Higher Education. Each assessment committee is set up for one study cycle and has its own chair; he chaired several of them.

Polytechnic Higher Education in Portugal

(2009 – 2012)

Member of the Scientific Technical Council of ISEP.

Member of the Scientific Council of the Construction Studies Centre – CEC at the Faculty of Engineering of University of Porto (FEUP) – R&D Unit which is part of the network of research units qualified by the Foundation for Science and Technology (FCT). (2008 – 2015)

Member of the Coordinating Committee of the Scientific Council of ISEP – School of Engineering, Technical University of Porto. (2006 – 2007)

PROFESSIONAL TUTORIAL ACTIVITIES

Orientation of Professional Internships at the Order of Portuguese Engineers.

Márcio Manuel Ferreira da Cunha, Member n° 42085 North Region

North Region 2005

Distinguished by the Ordem dos Engenheiros with the Young Engineer Innovation Award, for the creation of a fastening system for ventilated facades.

Tiago Simão Pereira Duarte, Member n° 15143 North Region

North Region 2006

Comparative study of the main international regulations in the field of Structural Safety and Structural Concrete - ACI-318 (USA), EC (Eurocodes) and Portuguese (REBAP and RSA)

Caixa Geral de Depósitos [bank]

Instructor for the bank's technical staff on "Risk Analysis and Management of Real Estate Enterprises". During this period, he prepared the respective support literature.

He acted as a supervisor and instructor for the Real Estate Appraisal Courses and Seminars in Lisbon, Porto and Faro organised by the company and in was charge of explaining "Statistical Methods Applied to Real Estate Appraisal". (1983–2000)

TEACHING ACTIVITIES

University of Minho Guimaraes

Guest Assistant, Degree in Civil Engineering of 5 curricular years 1991–1998

He taught the practical classes of the subject "Reinforced and Prestressed Concrete", under the regency of Prof. Aníbal Costa

Polytechnic Institute of Bragança Bragança

Guest Assistant, Degree in Civil Engineering of 5 curricular years 1999–2000

He taught the practical classes of the subject "Reinforced and Prestressed Concrete", under the regency of Prof. Manuel de Azeredo

University of Minho Guimaraes

(1991–1998)

University of Minho – Engineering School

Assistant Professor for the full-year course "Construction Materials" chaired by Professor Luís B. Aguiar, for which I was responsible for practical classes and laboratory work.

Assistant Professor for the full-year course "Reinforced and Prestressed Concrete" chaired by Professor Aníbal Costa, for which, he was responsible for practical classes and laboratory work.

During this period, he prepared support notes and tools for the course, and prepared calculation tables and various supplementary notes on applicable legislation, particularly about foundations and slabs.

University of Porto – Faculty of Engineering

(1995)

Civil Engineering Department

Visiting Professor for the Master's Degree in Construction of Buildings, for which, he supervised, prepared and evaluated the "Construction Financing" course.

(1999)

Visiting Professor for the Master's Degree in Construction of Buildings chaired by Prof. Manuel Azeredo, in which he collaborated in the "Numeric Methods" course for the presentation of "Numeric Simulation Techniques".

Universidade Técnica de Lisboa – Higher Technical Institute

(1994)

Visiting professor for the Post-graduate Degree in Property Management, in the “Property Appraisal and Construction Financing” course.

Polytechnic Institute of Bragança – Higher School of Technology and Management

In 1999, he was a Visiting Assistant Professor in the Civil Engineering Department.

He chaired and wrote the lecture notes for the “Reinforced and Prestressed Concrete” course for the 5th year of the Licentiate Degree in Engineering.

(2000)

He chaired the “Reinforced Concrete” course for the 3rd year of the Bachelor’s Degree in Civil Engineering.

Universidade Lusíada – Faculty of Architecture

Visiting Professor (2004–2006)

He chaired the Property Appraisal course (Banking Perspective module).

The University of Queensland (Australia) (October 2012- April 2013)

Sabbatical Leave: Reviewing of research work completed at the University of Queensland on structural characterisation of weathered granite panels.

Integration of UQ research output with that from Porto on natural stone prestressed panels.

Meeting with industry and formulation of collaborative research plan between UQ and Porto on the design of thin structural stone veneers.

Warsaw University of Technology (Visiting Professor (2014 2nd semester)

Course in “New Methodologies for the Design of Dimension Cladding Stone”

Lessons were focused on the presentation of straightforward formulae for computing action on cladding based on the Load and Resistance Factor Design Format (LRDF) to calculate the minimum slab thickness in high-rise building’s facades.

ISEP – School of Engineering, Technical University of Porto (UTP; the former Polytechnic Institute of Porto) (2000-2020)

(2000 – 2009) Full-time Adjunct Professor Teaching practical classes and preparing manuscript notes for the “Quality, Safety and Environment” course for the 2nd year of the bachelor’s degree in Civil Engineering – Series of Management Courses.

Teaching of practical classes and preparing notes for the “Construction Methods and Techniques I” course for the 5th year of the Licentiate Degree in Civil Engineering – Series of Construction Courses.

Teaching practical classes and preparing notes for the “Quality, Safety and Environment” course for the 2nd year of the bachelor’s degree in Civil Engineering.

He chaired and lectured theoretical and practical classes for the “MTC I” course – “Construction Methods and Techniques I” for the Licentiate Degree in Civil Engineering – 5th year of the Series of Construction Courses. He began to restructure the course, including the preparation of texts, to adjust the content and to make it compatible in the field of building construction technology.

He chaired and lectured theoretical and practical classes for the “MTC II” course – “Construction Methods and Techniques II” for the Series of Structures Courses for the Licentiate Degree in Civil Engineering – 5th year.

He began to restructure the course, including the preparation of texts, to adjust the content and make it compatible with the program covering the field of detailed design, structural design and checking the safety of structural joints in concrete, metallic and mixed structures.

Professor responsible for the Construction section of the Civil Engineering Degrees and for coordinating the following courses:

Conservation and Rehabilitation; Construction Design; Buildings I; Buildings II; Architectural Aspects; Construction Physics; Descriptive Geometry and Design; Installations at Buildings; Construction Methods and Techniques I; Construction Materials; Non-structural Materials; Planning and Urban Development.

Director of the Master’s Degree: Construction Technology and Management. (2009 – 2010)

He chaired the Curricular Unit “Construction Systems Technology” of the 1st Semester – 2nd year of the Master’s Degree: Construction Technology and Management.

He chaired the Curricular Unit “Non-structural Materials” of the 2nd Semester of the 1st year of the Master’s Degree: Construction Technology and Management.

Director of the Master’s Degree: Construction Technology and Management. (2010 – 2011)

He chaired the Curricular Unit “Construction Systems Technology” of the 1st Semester – 2nd year of the Master’s Degree: Construction Technology and Management.

He chaired the Curricular Unit “Technology of Structural Connections” of the 1st Semester – 2nd year of the Master’s Degree in Civil Engineering.

He chaired the Curricular Unit “Facades Systems and Technology” of the 2nd Semester – 1st year of the Master’s Degree in Civil Engineering.

Director of the Master’s Degree Study Cycle in Civil Engineering – ISEP (2010 – 2016)

Coordinating Professor with Habilitation – Master’s Degree in Civil Engineering, 300 ECTS (2010 – 2020) Professor in charge of the Curricular Units “Real Estate Appraisal” (Construction Management option), “Technology of Structural Connections” (design of construction processes, prefabricated structural systems and their connections) and “Façade Technology / Façade Engineering” (structural design of façade systems); supervisor, examiner and chair of juries of Master’s dissertations, projects and internships.

Frequently acts as examiner in public defences of PhD theses and pre-Bologna Master’s dissertations in Civil Engineering at the University of Minho, the Technical University of Lisbon and the University of Porto, as well as in public examinations for the award of the title of Specialist in Civil Engineering at several Polytechnic Institutes.

Retired (*jubilado*) Coordinating Professor with Habilitation of ISEP – Technical University of Porto since March 2020.

FIPP – Foundation Polytechnic Institute of Porto – Institute for Technological Development

(2005–2009)

Instructor responsible for the following modules: “Advanced Appraisal Methods”, “Combined Method”, “Land Appraisal” of the 1st and 2nd edition of the specialised course on “Real Estate Investment Appraisal and Analysis”.

Scientific Coordinator of the 1st and 2nd editions of the specialised course in “Real Estate Appraisal and Investment Analysis” – accredited by the Securities Market Commission (CMVM).

Coordinator of the 8th specialised course in “Real Estate Appraisal and Investment Analysis” – accredited by the Securities Market Commission (CMVM). (2006 – 2009)

Supervision of Professional Internships and Master Thesis (2007-2020)

“Comparative Study of the Main International Regulations in the Field of Structural Safety and Structural Concrete – ACI – 318 (USA), EC (Eurocodes) and Portuguese regulation (REBAP and RSA) – for creating legislation for the Republic of Cape Verde.” The Internee was regarded as capable of exercising his profession.

Supervision of End of Course Projects (Bachelor’s and Licentiate Degrees in Civil Engineering) – Pre-Bologna Period – ISEP)

– “Study of a prototype model for natural stone panels with post-tensioned parts”.

Erasmus program under the topic: “Structural and Economical Optimization of multi-span concrete bridges”, – University of Kaho Sint-Lieven – Belgium.

– “Experimental study on pull-out systems of dowel anchorages with limestone and marble cladding”.

– “Experimental study of pull-out systems in “kerf” with limestone and marble cladding”.

– “Study for Financing a Real Estate Enterprise”;

– “Methods for Evaluating Residential Units in Horizontal Property for Commercial Purposes”;

– “Land Appraisal Methods”;

– “Structural design of glass façades and their supports in aluminium alloy profiles”.

– “Applicability of Natural Stone in Building Façades – Methods and Techniques”

– Supervised the Seminar – 3rd year of the Bachelor’s Degree covering the work: “Project and Structural Design of an Industrial Building made of Reinforced Concrete without relying on automatic calculation”.

– “Metallic Structure Project for an Industrial Building – roof with a 50 m span”.

Of the Seminar of the 3rd year of the Bachelor’s Degree on the topic: “Project and Structural Design of a 5-storey building made of Reinforced Concrete without relying on Automatic Calculation”.

– “Economic and Financial Feasibility Study for Real Estate Enterprises – Determining the Financing Needs for a Real Estate Investment”.

– “Study and Project on Structural Systems for Shell Roofs – Application to the specific case of conical surfaces with application of straight pre-stressing in parabolic hyperboloids”;

– “Structural and Economic Characterisation of Beam-and-Block Slabs with Prefabricated Ribs.”

Of the Seminar of the 3rd year of the Bachelor’s Degree in Civil Engineering for the topic: “Comparative Study of the Deformation Calculation of Floor Systems made of Prestressed Ribs”.

– “Study on the Prefabrication and Calculation of a Beam with a Δ shape, Prestressed by Pre-tensioning with a 20-metre span”.

Participation in The Organisation of Scientific Events

(2012)

Scientific Committee Member and Referee of the 15WCEE the 15th World Conference on Earthquake Engineering to held at Lisbon- 24th to 28th September 2012.

(2011)

Member of the Scientific Committee and of the Organizing Committee for the 6th Mozambican - Portuguese Congress held at Maputo – Mozambique – 29th August to 2nd September.

Member of the Scientific Committee and of the Organizing Committee for the 3rd Mozambican Congress on Engineering held at Maputo – Mozambique – 29th August to 2nd September.

Member of the Scientific Committee and of the Organising Committee for the Workshop “Facades – Techniques and Solutions” organised by GICEC – Research and Civil Consultancy Group of ISEP.

<http://www.engenhariacivil.com/fachadas-tecnologia-solucoes-isep>

(2010)

Member of the Scientific Committee and of the Organising Committee for the Workshop “Natural Stone for Construction” organised by GICEC – Research and Civil Consultancy Group of ISEP.

http://www.isep.ipp.pt/mostra_prox_evento.php?id=789

(2009)

Member of the Scientific Committee of the 2nd Portuguese-Brazilian Meetings on Engineering Education and Technology, 2009 – Porto – Portugal.

(2008)

Member of the Scientific Committee and of the Organising Committee for the Workshop “Natural Stone for Façades – Fastening Methods, Pathologies and Solutions”.

Member of the Scientific and Organising Committee of the 1st Meeting of Assessors of FIPP – Polytechnic Foundation of Porto, Porto, 2008.

(2003)

Member of the Organising Committee for the Scientific Meetings at ISEP, covering the topic: “Environment, Research & Corporate Innovation”.

(2004)

Member of the Scientific Committee of the Meeting “The European Concrete Standards (Eurocode 2) in Practice”, Porto, 2004.

Revestimentos em pedra natural com fixação mecânica

Natural Stone Cladding with Mechanical Fixation - Dimensioning and Project, Lisbon 2009

ISBN: 978-972-618-561-1

Springer© International Edition

Stone Cladding Engineering, AZ Dordrecht – The Netherlands 2014

ISBN: 978-94-007-6847-5

CMM ©

Manual de Dimensionamento de Fachadas Envidraçadas

Manual for Dimensioning Glazed Facades: Structural Behavior, Coimbra 2017

ISBN: 978-989-99226-7-9

Livraria de José Alves© – Editor and Co-Author

Avaliação Imobiliária (Real Estate Appraisal), Porto 2021, 680 pages

ISBN: 978-989-33-1449-4 <http://id.bnportugal.gov.pt/bib/bibnacional/2078760>

Authors' Edition, 1st Edition

Engenharia de Investimentos Imobiliários (Real Estate Investment Engineering), Porto 2025

ISBN: 978-989-33-6908-1

Authors' Edition – Co-Author (with Mário Miranda)

Alvenarias em Fachadas – Dimensionamento Estrutural (Masonry in Façades – Structural Design),
October 2026, *in print*

ISBN: 978-989-34-0448-5

BOOK CHAPTERS

McGraw-Hill© Chap. 30 - Structural Glass

Structural Engineering Handbook, Fifth Edition / Edition 5, New York 2020

ISBN13: 9781260115987

McGraw-Hill© Chap. 33 - Stone Cladding

Structural Engineering Handbook, Fifth Edition / Edition 5, New York 2020

ISBN13: 9781260115987

Public Evidence Monographs

FEUP Master's Thesis

Lajes pré-esforçadas com cabos não aderentes (Dimensionamento e Projecto) Porto 1990

FEUP PhD Thesis

Economic and Structural Performance of beam-and-block Slabs with Pre-tensioned Beams, Porto 2003

Public Lesson Title of Coordinating Professor

Rain screen curtain walls, ISEP – Porto 2005

Habilitation (Aggregation) Examination in Civil Engineering – FEUP 2010

Lecture: “Natural Stone Cladding with Mechanical Fixing – Design and Detailing” (Revestimentos em Pedra Natural com Fixação Mecânica – Dimensionamento e Projecto); report on the programme, contents and teaching methods of the study cycle “Master’s Degree in Façade Engineering”.

Papers in Journals and Conference Proceedings

- 2006

Limit States of Cracking in Beam-and-Block Floor Systems using Precast Prestressed Ribs; Camposinhos, Rui de S.; Serra Neves, A.

Structural Concrete Journal (FIB) No 3 pp. 117-127

- 2009

Dimension Stone Cladding Design with Dowel Anchorage; Camposinhos, Rui de S.; Camposinhos, R.A. Proceedings of the ICE - Construction Materials ISSN: 1747-650X, E-ISSN: 1747-6518 Volume 162, Issue 3, pp. 95-104

- 2011

Slate Flexural and Anchorage Strength Considerations in Cladding Design; Camposinhos, Rui de S.; Pires, V. Construction and Building Materials; Elsevier Ltd (UK) (October 2011), p. 3966-3971 ISSN: 0950-0618 <http://www.sciencedirect.com/science/article/pii/S0950061811001693>

- 2012

Dimension Stone design - Kerf Anchorage in Limestone and Marble Camposinhos, Rui de S.; Camposinhos, proceedings of the ICE - Construction Materials, Volume 165, Issue 3, 01 June 2012, pages 161 -175 ISSN: 1747-650X, E-ISSN: 1747-6518 <http://www.icevirtuallibrary.com/content/article/10.1680/coma.8.00052>

- 2012

Headed Wires in Concrete Connections Camposinhos, Rui de S.; Serra Neves, A. Proceedings of the ICE - Structures and Buildings, Volume 165, Issue 2 ISSN: 0965-0911, E-ISSN: 1751-7702.

- 2012

Dimension Stone Design Partial Safety Factors Camposinhos, Rui de S. Proceedings of the ICE - Construction Materials, Volume 165, Issue 3, 01 ISSN: 1747-650X, E-ISSN: 1747-6518

- 2012

Undercut Anchorage In Dimension Stone Cladding Camposinhos, Rui de S. Proceedings of the ICE - Construction Materials, Thomas Telford

- 2013

Natural Stone Testing Specification for a New Façade System Camposinhos, Rui de S.; Lello, J.C.; Amaral P. Int. J. of Sustainable Materials and Structural Systems Vol.1, No.2, pp.161 - 187 ISSN: 1662- 9795 10.4028/www.scientific.net/KEM.548.295

- 2013

Structural Performance of Prestressed Façade Limestone Panels Camposinhos, Rui de S.; Lello, J.C.; Neves, M.T.; Santos R.P. Key Engineering Materials - Journal - Volume 548 ISSN online: 2043-863X ISSN print: 2043-8621 DOI: 10.1504/IJSMSS.2013.056471

- 1993

The Influence of Compression Loss on the Resistant Capacity of Prestressed Beams and Slabs Camposinhos, Rui de S.; Azeredo, M. Portuguese Journal of Structural engineering. nr 35, 1993

- 2005

Limit States of Vibration in Unidirectional Pavements Camposinhos, Rui de S.; Delgado R.; Serra Neves, A. Portuguese Journal of Structural Engineering No. 54, March 2005

- 2018

“*Real estate and matrix analysis*,” Journal of Finance and Investment Analysis, SCIENPRESS Ltd, vol. 7(2), pages 1-1.

- 2019

“*A Dynamic Approach to the Cost Method in Real Estate Appraisal*”, Journal of Finance and Investment Analysis, vol. 8, no. 4, 2019, 01-17 ISSN: 2241-0998 (print version), 2241-0996 (online), Scientific Press International Limited

- 2020

“*Fractional-order modelling of epoxy resin*”, Philosophical Transaction A, The Royal Society 378: 20190292, DOI: <http://dx.doi.org/10.1098/rsta.2019.0292>

- 2025

“*Relative Leasing Advantage: A Blended Method Approach*”, Camposinhos, Rui; Lello, José; Zeitschrift für Immobilienökonomie – German Journal of Real Estate Research, Published Online First, <https://doi.org/10.3790/gjrer.2025.1465002>

“*Functional Obsolescence in Real Estate Appraisal*”, Camposinhos, Rui de S.; The Appraisal Journal – Appraisal Institute, Chicago, IL (*forthcoming*)

Papers in Conference Proceedings and Other Publications

- 2018

“*Real Estate Appraisal – Cost Method – Pseudo-Dynamic Approach*” (Avaliação Imobiliária – Método do Custo – Abordagem Pseudo-Dinâmica), Construção 2018 Congress, Porto.

- 2012

“*Seismic Behaviour of Point Supported Glass Panels*” - Challenging Glass - International conference on the Architectural and Structural Applications of Glass, 2012, TU Delft, The Netherlands co-author with R. Delgado et al.

“*Spider Glass Behavior Under Seismic Action*” - 15WCEE - World Conference on Earthquake Engineering, September 2012, Lisbon- Portugal

“*Dimension Stone Cladding Design with Undercut Anchorage*” Global Stone Congress 2012, Alentejo, Portugal, July 2012.

“*Natural Stone Panel Specification For a New Facade System*” co-authored by P.M. Amaral, J.C. Lello; Global Stone Congress 2012, Alentejo, Portugal, July 2012.

- 2010

“Prestressed Façade Stone Panels” – MERSEM 7 “Marble and Natural Stone Congress”; Afyon - Turkey, 2010, co-author with J. Lello.

“Slate Flexural and Anchorage Strength Considerations in Cladding Design” - Global Stone Congress, 2010, Alicante; co-author.

“Presstressing Stone - an Innovative Cladding Façade System” Global Stone Congress, 2010, Alicante; co-author with J. Lello; *“Partial Safety Factors in Dimensioning Stone Design”*; Global Stone Congress, 2010, Alicante;

- 2009

“Facades Cladding with Mechanically Fixed Natural Stone” “II Luso-Brazilian Conference on Teaching and Technology in Engineering - JLBE 2009, co-author with Silva, F.; pp. 587-595; Edition Feb 2009 Porto”.

“Dimensioning Cladding in Natural Stone with Fixation by Dowels” published in “PATORREB 2009 - 3rd Meeting on Pathology and Rehabilitation of Buildings”, co-author Porto, 2009

“Pathology in Natural Stone -Stain in Yellow Granite Cladding” published and presented in “PATORREB 2009 - 3rd Meeting on Pathology and Rehabilitation of Buildings”, lead author Porto,

- 2008

“Dimension Stone Cladding Design - Dowel Anchorage Design” – published and presented at “*Second International Congress in Dimension Stones*”; lead author in co-authorship with P.M. Amaral, Instituto Superior Técnico, L. Guerra Rosa, Instituto Superior Técnico, Vera Pires, FrontWave - Materials Engineering, Taguspark; Carrara, Italy, 2008

“Self-Pressurised Facades -Part 2”; Magazine “Engineering and Life” n° 43 - Feb. 2008, pp 40-43, Imagem Marketing Comunicação e Gestão Lda. 2008

“Facades Dimensioning - Direct Fixation”, main author; Magazine “Arquitectura e Vida” n° 90 - Feb 2008, pp88-92, Loja da Imagem Marketing Comunicação e Gestão Lda. 2008

“Self-Pressurizable Facades - Part 1”; Magazine “Engenharia e Vida” n° 42 - Jan 2008, pp 28-33, Loja da Imagem Marketing Comunicação e Gestão Lda. 2008

“Natural Stone Coatings - Indirect Fixation”; Magazine “Architecture and Life” n° 89 -Jan 2008, pp. 86-91, Loja da Imagem Marketing Comunicação e Gestão Lda., 2008.

- 2007

“Application of Products in Ornamental Stones - Knowledge for those who apply”; Magazine “Engenharia e Vida” n° 41 year IV, pp36-41, Loja da Imagem Marketing Comunicação e Gestão Lda., 2007.

“Pressurizes rainscreen facades”. The 3rd National Construction Congress FCTUC, Faculty of Science and Technology of the University of Coimbra - December 2007.

- 2004

“Prefabricated Flooring - a Structural Performance Quality Assessment Model”, 2nd National Construction Congress, Porto, 2004; lead author in co-authorship with A. Serra Neves and Hipólito Sousa (FEUP).

“Dimensioning of Glazed Surfaces under the Action of the Wind”; 2nd National Construction Congress, Porto, 2004; first author.

“Designing of Steel Wire Mooring with Headed Ends” National Structural Concrete Meeting 2004, Porto 2004; main author; co-authored with J. Azevedo Figueiras and A. Serra Neves (FEUP).

“Verification of Conditions of Human Comfort under Induced Vibrations in Lightweight Concrete Pavements”, National Meeting of Structural Concrete 2004, Porto 2004, principal author in co-authorship with Raimundo Moreno Delgado and A. Serra Neves (FEUP).

“Structural Efficiency of Lightweight Pavements with Prefabricated Elements”, 46th Brazilian Congress.

“Beam-and-Block Floor Systems - A Comparative Study”; Socrates Community Action Program in the field of educations - The European Concrete Standards (Eurocode 2) in Practice; Porto, 2004. Principal author in co-authorship with Ricardo Santos (ISEP).

- 2003

“Assessment of the Cracking Limit State in Composite Concrete Paving with Prefabricated and Prestressed Ribs”; V Symposium on Concrete Structures in S. Paulo, Brazil; Main author in co-authorship with A. Serra Neves. Communication published in the Symposium book. “Evaluation of deformation in semi-prefabricated floors with prestressed elements”, 45th Brazilian Concrete Congress; in Victoria E.S. in Brazil lead author in co-authorship with Professor A. Serra Neves.

- 2002

“Study of Prestress wire anchorage”, lead author in co-authorship with J. Azevedo Figueiras and A. Serra Neves, National Meeting of Structural Concrete 2002, Lisbon.

- 2001

“Structural and Economic Performance of Lightweight Pavements Made with Prestressed Prefabricated Elements” lead author in co-authorship with A. Serra Neves, National Construction Congress 2001, Instituto Superior Técnico of the Technical University of Lisbon.

- 2000

“Simulation in the Analysis of Investment in Real Estate Projects”, 1st Congress of the Portuguese Association of Engineering Assessments (APAE), Lisbon.

- 1998

“Quality and Dwelling Houses in Financing Schemes”; World Housing Congress, I.A.H.S. (International Association for Housing Science), Lisbon.

“Determining Financing Costs of Construction Development programs” edition of Caixa Geral de Depósitos, Lisbon.

- 1997

“Application of Simulation Techniques in the Analysis of Financing and Investment in Real Estate”, edition of the Ordem dos Engenheiros, April 1997, Lisbon.

- 1994

“Real Estate Appraisal and Investment Analysis”, edition of ITEC and the University of Salford, of the European Advanced Course in Construction and Real Estate Management, Lisbon.

“Real Estate Appraisal and Construction Financing”, published in the Portuguese Magazine of Construction Materials.

“Simulation Techniques in Finance and Investment Analysis to Real Estate” edition of the World Housing Congress, organized by I.A.H.S, Porto.

- 1993

“Real Estate Appraisal and Construction Financing” Meeting - Construction Policy, Porto - FEUP.

- 1992

“*The Influence of Pre-Compression Loss in Beams and Slabs*”, co-authored with Professor Manuel de Azeredo, edition of the 4th Meeting of Prestressed Structures, Lisbon.

Scientific Articles Reviewer

Peer reviewer of publications in several Proceedings of Scientific Congresses and journals such as the Journal of Structural Engineering; the Structural Safety Journal; Construction and Building Materials Journal; Municipal Engineer Journal; Journal of Construction Engineering and Management – ASCE; Journal of Finance and Investment Analysis; Journal of Facade Design & Engineering.

Technical Reports

- “Diagnostic Report on the Status of the Granite Slab Cladding System in the Building, Paço da Boa Nova” - Leça da Palmeira, GICEC- Civil Engineering Research and Consulting Group, Porto, 2007.

- “Diagnostic Report on the Status of the Granite Slab Coating of the Building in Póvoa do Varzim”, GIEC- Civil Engineering Research and Consulting Group, 2008.

- “Study on the feasibility of applying slate in facade cladding” - Natura Towers, MSF - Moniz da Maia, Serra & Fortunato Empreiteiros,- Lisbon, GICEC- Civil Engineering Research and Consulting Group, 2009.

- Study and Consultancy of Design of Wind Resistant Masonry According to EC 6 MSF - Lisbon, GICEC- Research and Consultancy Group in Civil Engineering, 2009

- “Study and Project of Limestone Coating for the MSF Company”- GICEC- Civil Engineering Research and Consulting Group, 2009”

- “Use of Natural Stone with Fixation through Metal Anchor Devices - Internal Technical Report”, Rui Camposinhos, CICCOPN, ISEP, Porto, Jan 2006.

- “Study of Mooring of Prestressed Steel with End Devices”; publication and edition of the Structures Office of the Civil Engineering Department of FEUP, co-authored with A. Serra Neves and J. A. Figueiras. FEUP 2000.

- “Final Expert Report - Glass Breakage”; Guimarães Court of Appeal, 2019.

Academic Textbooks
