

Rui Camposinhos (PhD)
EUR ING Civil Engineer (34842)
Engenheiro Conselheiro
Ordem dos Engenheiros (20900)

Especialista em Engenharia de Estruturas (O.E.)
Especialista em Avaliações de Engenharia (O.E.)

Camposinhos, Rui de Sousa

Curriculum Vitae

Professional Credentials

- 1986 **Member of the Portuguese Order of Engineers (Ordem dos Engenheiros, O.E.), Registration n.º 20900, 20-11-1986**
- 2010 **Specialist Engineer in Structural Engineering, entitled by the O.E.**
- 2020 **Specialist Engineer in Engineering Appraisal, entitled by the O.E.**
- 2021 **Chartered Counselling Engineer (*Membro Conselheiro*, the highest grade of the O.E.)**
- 2022 **European Engineer EUR ING, 2nd cycle (n.º 34842 FEANI – European Federation of National Engineering Associations)**
Member of EdF – Portuguese Association of Façade Engineering (<https://engfachadas.pt>)

Academic Titles and Degrees

- 2010 **Habilitation (*Agregação*) in Civil Engineering, University of Porto, Porto**
- 2000–2004 **PhD in Civil Engineering, University of Porto, Porto, Thesis**
Economic and Structural Performance of Beam-and-Block Slabs with Pre-tensioned Ribs
- 1989–1991 **Master's degree in Building Construction (pre-Bologna, two-year cycle), University of Porto, Porto, Dissertation**
Prestressed Slabs with Unbonded Tendons – A Guide for Structural Design and Detailing
- 1981–1986 **Licentiate degree in Civil Engineering (pre-Bologna, five-year cycle), University of Porto, Porto**
Option: Building Construction
- 1973–1976 **Bachelor in Civil Engineering (three-year cycle), Industrial Institute of Lourenço Marques (Polytechnic of Maputo), Mozambique**
Specialisation Courses
- 1994 **Quality Management in Construction and Real Estate Appraisal, ITEC – University of Salford, Lisbon**
- 2005 **Rainscreen – Principles and Specification, University of Bath – Centre for Window and Cladding Technology, U.K.**
- 2008 **Finite Elements with MATLAB, FEUP – Faculty of Engineering, University of Porto, Porto**

Career Overview

- Began his professional activity in 1976 as a trainee Technical Engineer in the Urban Development Department of Lourenço Marques (Mozambique), under the guidance of the architects João José Tinoco and Octávio Rego Costa, as reinforced concrete designer and construction surveyor.
- In 1977 joined Banco Nacional Ultramarino as Deputy Director of Works, supervising the construction of the bank's new head-office buildings under Eng. Álvaro M. B. Pereira Forjaz; in 1979 assumed the role of Technical Director, with increased responsibilities in the management of the bank's real estate.
- In Portugal, from 1982 onwards, structural designer of reinforced concrete structures as an independent professional.
- In 1986 joined the technical staff of the public bank Caixa Geral de Depósitos (CGD) as technical assistant, later Technical Consultant Engineer; there he began the appraisal and analysis of real estate investment projects, as well as the supervision and monitoring of works. Between 1983 and 2000, alongside his design activity, he carried out hundreds of studies for the CGD Board as consultant and analyst of large-scale real estate investments.
- In 1987 began his scientific activity in Structural Engineering under the tutorship of Professor Manuel de Azeredo e Mello (FEUP); at the end of 1988 became interested in unbonded prestressed concrete and completed his Master's dissertation in 1990 with an exhaustive study of unbonded mono-strand internal prestressing systems.
- In 1991 began lecturing as Guest Assistant at the University of Minho (Reinforced and Prestressed Concrete; Construction Materials).
- In 1997 joined the University of Porto as research fellow at the Laboratory of Concrete Technology and Structural Behaviour; under Prof. Manuel de Azeredo pursued doctoral studies in structural reliability, interrupted at the end of 1999.
- In 2000 resumed his PhD with Prof. A. Serra Neves, studying beam-and-block floor systems with pre-tensioned ribs, for which he developed a theory of economic efficiency of prefabricated floors, and presented a new approach to the cracking limit state of pre-tensioned elements, published in the *Structural Concrete Journal of the FIB* ("Limit States of Cracking in Beam-and-Block Floor Systems using Pre-tensioned Ribs"). In this context he researched prestressing wire anchorage, publishing design formulations in *Structures & Buildings*, ICE ("Headed Wires in Concrete Connections").
- In 2000 appointed Adjunct Professor at ISEP – School of Engineering, today of the Technical University of Porto (UTP; until 2026 the Polytechnic Institute of Porto), devoting himself exclusively to applied research and coordinating consultancy activities at FEUP and ISEP. Coordinating Professor in 2006, with Habilitation in 2010, and Director of the Master's Degree in Civil Engineering.
- In 2004 began studies on mechanical fixing systems for natural stone cladding with anchors, published in the ICE journal *Construction Materials* ("Dimension Stone Cladding Design with Dowel Anchorage", "Dimension Stone Design – Kerf Anchorage in Limestone and Marble", "Undercut Anchorage in Dimension Stone Cladding").
- Trainer recognised in 2006 by the CMVM – Portuguese Securities Market Commission for Real Estate Appraisal courses.
- Between 2006 and 2014 coordinated the specialisation courses in Real Estate Appraisal and Investment Analysis at IDT – Institute for Technological Development, Porto, supervised several final works of that course and published several educational texts on real estate investment analysis ("Deterministic Analysis of Real Estate Investments", "Probabilistic Analysis of Real

Estate Investments”).

- In 2007 coordinated the Scientific Commission “Structural Safety and Concrete Structures” of an international project, financed by the World Bank, to assist the Civil Engineering Laboratory of Cape Verde.
- At the beginning of 2009 coordinated the development of a prototype for façade panels in prestressed natural stone, on the market since the end of 2012.
- From 2011 chaired several Assessment Committees of Study Cycles in Civil Engineering of A3ES – the Portuguese Agency for Assessment and Accreditation of Higher Education (each committee, set up for one study cycle, has its own chair).
- October 2012 to April 2013: Visiting Professor (sabbatical leave) at The University of Queensland, Australia.
- 2014 (2nd semester): Visiting Professor at the Warsaw University of Technology.
- Between 2016 and 2018 professor in charge of the curricular units of the Postgraduate Course in Real Estate Appraisal at ISEP: “Financial Mathematics”; “Mixed Method”; “Real Estate Investment Analysis”; “Land Appraisal”; “Real Estate Appraisal – Lease or Acquisition”.
- Between 2018 and 2019 published “A Dynamic Approach to the Cost Method in Real Estate Appraisal” and “Real Estate and Matricial Analysis” in the *Journal of Finance and Investment Analysis* (both with M. Rosário Oliveira), and “Real Estate Appraisal – Cost Method – Pseudo-Dynamic Approach” in the proceedings of the Construção 2018 congress, Porto.
- In 2021 published, as editor and co-author, the 680-page book *Avaliação Imobiliária* (Real Estate Appraisal) and in 2025 *Engenharia de Investimentos Imobiliários* (Real Estate Investment Engineering).
- Since March 2020 retired (*jubilado*) Coordinating Professor with Habilitation of ISEP – Technical University of Porto; since 2022 working exclusively as an independent professional – structural and façade designer, consultant, court-appointed expert and real estate appraiser.

Professional Experience

Works Management and Supervision

- 1975–1976 **Trainee Engineer**, *Urban Development and Housing Department of Lourenço Marques – MOPH*, Mozambique
- Internship covering Structures and Hydraulics:
- Projects for urban water supply networks;
 - Projects for reinforced concrete structures of residential buildings;
 - Inspection of State works, particularly the construction of schools and health centres in the outlying areas of Lourenço Marques (Maputo).
- 1977–1981 **Deputy Technical Director**, *Banco Nacional Ultramarino / Banco de Moçambique*, Mozambique
- Tender coordination, promotion and inspection management of the contract works for the bank’s new head-office building in Lourenço Marques (14 floors) and branch buildings in Tete (10 floors) and Nacala (10 floors);
 - Technical management and inspection of the contract works for the 22-storey tower at Praça Vasco da Gama, downtown Maputo, begun in 1974 as the new head office of BCCI – Banco de Crédito Comercial e Industrial (then a subsidiary of Borges & Irmão) and, after nationalisation, assigned to the commercial services of Banco de Moçambique;
 - Management of the maintenance of the BNU real estate portfolio in Mozambique; responsible for the preparation of the bank’s Comprehensive Maintenance Plan for Real Estate Assets (PGMPI).

Real Estate Investment Analysis and Management

1983–2000 **Technical Consultant Engineer**, *Real Estate Appraisal*, CGD – Caixa Geral de Depósitos

- Preparation of studies and opinions on large investments in civil construction and public works;
- Real estate appraisal of mortgage guarantees for the financing of civil construction and public works companies;
- Appraisal of properties for future CGD premises;
- Risk and profitability analysis of civil construction investments; application of RAMP (*Risk Analysis and Management of Projects*) techniques in civil engineering; cost–benefit analysis of civil engineering projects;
- Follow-up and inspection of financed works;
- Appraisal of dwellings – houses and apartments – for mortgage lending;
- Design, realisation and implementation of specific computer applications for the above activities;
- Instructor of the bank's technical staff in “Risk Analysis and Management of Real Estate Enterprises”, having prepared the respective support literature; supervisor and instructor of the Real Estate Appraisal courses and seminars organised by the bank in Lisbon, Porto and Faro, in charge of the module “Statistical Methods Applied to Real Estate Appraisal”.

Design and Consultancy

Rua dos Calafates e Carpinteiros Navais, 77 1º Dto, Vila do Conde, 4480-194

Portugal

1982– Independent Professional

Structural designer and consultant.

Main works:

- Designer of steel, reinforced concrete and prestressed concrete structures, with emphasis on 12- to 15-storey buildings in Braga;
- Project for a 26-metre underground tunnel for heavy vehicle traffic under a road for the same type of traffic, for Reguladora, SA;
- Project for a 150 m³ water reservoir, for Reguladora, SA;
- Project for heavy prefabrication systems in pre-tensioned prestressed elements for the roofs of large-span industrial bays and for road viaducts, for Telhabel, SA;
- Designer of water and air pressure vessels for high pressures;
- Structural designer of storage structures for high-pressure vessels for AuGWIND – Israel (2021);
- Designer of pedestrian bridges and industrial buildings, and structural consultant, at CCAD – Serviços de Engenharia, Lda (2020–2025);
- Team coordinator for the design/construction proposal of Conduril, Lda for the CCF (*Closed Cavity Façade*) glazed façades of the New Permanent Office Building at the Palais des Nations, Geneva (2017). The proposal included solutions, detailing and dimensioning for: structural safety of the aluminium and timber elements of the CCF panel structure; safety of the triple-glazed panels; verification of vortex-induced vibration under parallel wind; verification of the vibration limit state of the slender panels; global and local buckling safety; safety of the outer laminated-glass sheets; determination of the stress installed in the structural sealing silicones; electronic control of the isochoric pressure of the panels; condensation risk analysis; acoustic behaviour study; specification of laboratory tests for air and water tightness, impact resistance and fire resistance; monitoring of on-site construction processes;
- Consultant and structural designer of façade structures for ACA – mechanically fixed (clip-anchored) natural stone façade systems (2024–2025);
- Forensic engineer reporting to courts of law: studies on building pathologies with expert reports for the Courts of Guimarães and Braga;
- Expert in damage analysis and structural rehabilitation;
- Expert appointed by the Court of Póvoa de Varzim – structural analysis of a 19th-century building;
- Expert appointed by the Court of Santa Maria da Feira – structural analysis of a factory after fire;
- Expert appointed by the Court of Porto – structural analysis of a 19th-century historic building in Rua dos Clérigos;
- Real estate and infrastructure appraiser and investment analyst;
- Appraisal and economic analysis of the museological rehabilitation of the former 19th-century water intake station of Foz do Sousa supplying the City of Porto (2025).

Research and Development Activities

Relevant Roles

1997–1998 **Assistant Researcher**, *Department of Civil Engineering – FEUP, Porto*

Under the guidance of Professor Manuel de Azeredo, carried out work on “Structural Reliability Using Computational Methods”. The models, based on the Monte Carlo method, aimed at calibrating failure probabilities of reinforced concrete structural elements under simple bending.

*Rua dos Calafates e Carpinteiros Navais, 77 1^o Dto, Vila do Conde, 4480-194
Portugal*

☎ +351 91 72 000 26 • ✉ campozinhos@gmail.com
🌐 camposinhos.com • [linkedin](https://www.linkedin.com/in/camposinhos/) academia.edu

- 1999–2000 **Assistant Researcher**, *Laboratory of Concrete Technology and Structural Behaviour – FEUP*, Porto
 Work on “Verification of Cracking Limit States in Pre-tensioned Concrete”. Presented, as main author, an alternative formulation more accurate than the traditional ones, published in the *Structural Concrete Journal of the FIB* under the title “Limit States of Cracking in Beam-and-Block Floor Systems Using Pre-tensioned Ribs”.
- 2000–2002 **Assistant Researcher**, *Laboratory of Concrete Technology and Structural Behaviour – FEUP*, Porto
 Applied research on the anchorage of prestressing wires with headed ends. From the test results, analytically studied the partial safety factors applicable to this type of anchorage and formulated design rules. The results gave rise to several papers, notably “Headed Wires in Concrete Connections” in *Structures & Buildings*, ICE – Institution of Civil Engineers.
- 2004–2006 **Principal Investigator**, *FEUP*, Centre for Construction Studies – Porto
 Studies on the behaviour of mechanical fixing systems for natural stone cladding with anchors, published in several papers of the ICE journal *Construction Materials*: “Dimension Stone Cladding Design with Dowel Anchorage”, “Dimension Stone Design – Kerf Anchorage in Limestone and Marble”, among others.
- 2006–2008 **Project Coordinator**, *ISEP*, Civil Engineering Research Group
 Coordinated the scientific committee “Structural Safety and Concrete Structures” of the international project, financed by the World Bank, for Technical Assistance to the Civil Engineering Laboratory of Cape Verde. The committee was responsible for drafting the legislation to be approved in the Republic of Cape Verde: RASE – Regulation of Actions and Structural Safety; RBE – Structural Concrete Regulation.
- 2007–2015 **Founding Member**, *GICEC – Research and Consultancy Group in Civil Engineering of ISEP*, Porto
 GICEC focused its R&D activity on three fundamental areas: Façade Engineering – study and development of new systems; Construction Management / Project Planning in the Construction Industry with Limited Resources; Rehabilitation and Strengthening of the Built Heritage – characterisation of structural materials, inspection of structures, identification of pathologies, strengthening solutions and structural behaviour analysis.
- 2009–2012 **Project Coordinator**, *ISEP*, Civil Engineering Research Group – Porto
 Coordinator of the Prestone© project – an R&D project in consortium, financed by ADI (QREN) in the amount of €413 000, to develop a prototype for façades in prestressed natural stone. Including several dozen full-scale tests, a method of applying prestress to wires with no initial losses and easy calibration was developed, suitable for short tie rods. The results were published in several papers, notably “Structural Performance of Prestressed Façade Limestone Panels” in the *International Journal of Sustainable Materials and Structural Systems*.
- 2010–2012 **Principal Investigator**, *FEUP*, Centre for Construction Studies – Porto
 Coordinator of the project on glazed panels under seismic action in façades. Part of the results were published in “Seismic Behaviour of Point Supported Glass Panels” – Challenging Glass, International Conference on the Architectural and Structural Applications of Glass, TU Delft, 2012, and “Spider Glass Behaviour Under Seismic Action” – 15WCEE, World Conference on Earthquake Engineering, Lisbon, September 2012.

 🌐 camposinhos.com • [linkedin](https://www.linkedin.com/company/camposinhos) academia.edu

2003–2008 **Founding Member**, *LABEST – Laboratory of Concrete Technology and Structural Behaviour – FEUP, Porto*

R&D unit of the network of research units qualified by the Foundation for Science and Technology (FCT). Participation in the design and performance of advanced construction and repair materials – self-compacting concrete (SCC), fibre-reinforced concrete (FRC) and ultra-high-performance fibre-reinforced concrete (UHPFRC); valorisation of industrial by-products and recycled aggregates in concrete; structural health monitoring (SHM); advanced numerical modelling of reinforced concrete structures; structural safety and service-life assessment of RC structures; simulation of RC structures from the onset of cement hydration, including the prediction of cracking due to restrained deformations.

2008–2020 **Integrated Member**, *CONSTRUCT – FEUP, Porto*

R&D unit of the network of research units qualified by the Foundation for Science and Technology (FCT). Participation in experimental and numerical studies of structures, structural components and construction systems under dynamic actions, seismic in particular, and in studies for the characterisation, assessment and mitigation of seismic risk in buildings and in transport and energy infrastructures; survey, diagnosis and field tests, including monitoring of existing structures, particularly built heritage, in support of rehabilitation and conservation; experimental and numerical studies of the short- and long-term dynamic behaviour of railway infrastructure (bridges, track, transition zones).

Support Activities for Higher Education

2006–2007 **Coordinating Committee of the Scientific Council of ISEP**, *Member*

2008–2015 **Scientific Council of the Centre for Construction Studies – CEC, FEUP**, *Member*, R&D unit of the network of research units qualified by FCT

2009–2011 **Scientific-Technical Council of ISEP**, *Member*

2010–2011 **Assessment Team Member**, *A3ES – Agency for Assessment and Accreditation of Higher Education*, University and Polytechnic Higher Education
Committee for the Assessment of Study Cycles in Civil Engineering

2011–2021 **Chair**, *A3ES – Agency for Assessment and Accreditation of Higher Education*, Polytechnic Higher Education

Chair of several Assessment Committees of Study Cycles in Civil Engineering – each committee, set up for one study cycle, has its own chair

Intellectual and Industrial Property

Patents:

2010 **Inventor – Portuguese Patent 104800**, *Int. Class. E04C 2/02 (2006.01)*, Lisbon
Autonomous Self-Pressurising System, Reactive to Rain, with Temperature Control in Façades, 07/04/2010

2010 **Inventor – Portuguese Patent 104770**, *Int. Class. E04C 2/00 (2006.01)*, Lisbon
Prestressed Panels made from Natural Stone Slabs and Steel Ties, 17/05/2010

Teaching and Academic Activity

Supervision of Professional Internships at the Portuguese Order of Engineers

2005 **North Region**, *Márcio Manuel Ferreira da Cunha*, *Member n.º 42085*

Distinguished by the Order of Engineers with the Young Engineer Innovation Award, for the creation of a fastening system for ventilated façades.

Rua dos Calafates e Carpinteiros Navais, 77 1º Dto, Vila do Conde, 4480-194

Portugal

- 2006 **North Region**, *Tiago Simão Pereira Duarte*, Member n.º 15143
Comparative study of the main international regulations on Structural Safety and Structural Concrete – ACI 318 (USA), Eurocodes and Portuguese regulations (REBAP and RSA) – for drafting legislation for the Republic of Cape Verde. The internee was regarded as capable of exercising the profession.
Higher Education Teaching
- 1991–1998 **Guest Assistant**, *University of Minho – School of Engineering*, Guimarães, Five-year Licentiate Degree in Civil Engineering
Practical and laboratory classes of the full-year course “Reinforced and Prestressed Concrete”, chaired by Prof. Aníbal Costa. Prepared support notes, calculation tables and supplementary notes on the applicable legislation, particularly on foundations and slabs.
- 1991–1992 **Guest Assistant**, *University of Minho – School of Engineering*, Guimarães, Five-year Licentiate Degree in Civil Engineering
Practical and laboratory classes of the full-year course “Construction Materials”, chaired by Prof. Luís Barroso de Aguiar.
- 1994 **Visiting Professor**, *Technical University of Lisbon – Instituto Superior Técnico*, Lisbon, Postgraduate Degree in Property Management
Module “Property Appraisal and Construction Financing”.
- 1994–1995 **Guest Assistant**, *University of Porto – FEUP*, Porto, Two-year Master’s Degree in Building Construction
Co-chair of the course “Construction Financing” with Prof. Vítor Abrantes – supervision, preparation and evaluation of the course.
- 1998–1999 **Guest Assistant**, *University of Porto – FEUP*, Porto, Two-year Master’s Degree in Building Construction
Practical classes of “Numerical Methods”, chaired by Prof. Manuel de Azeredo, presenting “Numerical Simulation Techniques”.
- 1999–2000 **Guest Assistant**, *Polytechnic Institute of Bragança – School of Technology and Management*, Bragança, Five-year Licentiate Degree in Civil Engineering
In charge of “Reinforced and Prestressed Concrete” (5th year), including the lecture notes, under Prof. Manuel de Azeredo; in 2000 in charge of “Reinforced Concrete” (3rd year of the Bachelor’s Degree in Civil Engineering).
- 2000–2006 **Adjunct Professor (full-time)**, *ISEP – School of Engineering, Technical University of Porto (UTP; the former Polytechnic Institute of Porto)*, Porto, Five-year Licentiate Degree in Civil Engineering
Professor in charge of the courses:
- Construction Methods and Techniques I ○ structural design of façade systems; re-structured the course, including the preparation of texts, to cover building construction technology
 - Construction Methods and Techniques II ○ design of construction processes, pre-fabricated structural systems and their connections; restructured to cover detailing, structural design and safety checking of structural joints in concrete, steel and composite structures

*Rua dos Calafates e Carpinteiros Navais, 77 1º Dto, Vila do Conde, 4480-194
Portugal*

- Quality, Safety and Environment
- 2nd year of the Bachelor's Degree in Civil Engineering – Management courses; practical classes and lecture notes
- Project
- individual project and final monograph
- 2004–2006 **Visiting Professor**, *Universidade Lusíada – Faculty of Architecture*, Porto
In charge of the course “Property Appraisal” (Banking Perspective module).
- 2005–2009 **Instructor and Scientific Coordinator**, *FIPP – Foundation of the Polytechnic Institute of Porto / IDT – Institute for Technological Development*, Porto, Specialised course “Real Estate Appraisal and Investment Analysis”, accredited by the CMVM
Instructor responsible for the modules “Advanced Appraisal Methods”, “Combined Method” and “Land Appraisal” of the 1st and 2nd editions; Scientific Coordinator of the 1st and 2nd editions; Coordinator of the 8th edition (2006–2009).
- 2006–2009 **Coordinating Professor**, *ISEP – Technical University of Porto*, Porto, Five-year Licentiate Degree in Civil Engineering
Head of the Construction section of the Bachelor's and Licentiate Degrees in Civil Engineering, coordinating the courses: Conservation and Rehabilitation; Construction Design; Buildings I; Buildings II; Architectural Aspects; Building Physics; Descriptive Geometry and Drawing; Building Services; Construction Methods and Techniques I; Construction Materials; Non-structural Materials; Planning and Urban Development. Teaching activity as in 2000–2006.
- 2009–2011 **Coordinating Professor**, *ISEP – Technical University of Porto*, Porto, Master's Degree in Construction Technology and Management – 300 ECTS
Director of the Master's Degree and professor in charge of the courses:
 - Real Estate Appraisal and Investment Analysis
 - Master's Degree in Construction Technology and Management
 - Construction Systems Technology I
 - structural design of façade systems
 - Construction Systems Technology II
 - design of construction processes, pre-fabricated structural systems and their connections
 - Non-structural Materials
 - 2nd semester, 1st year
 - Supervisor, examiner and chair of juries
 - Master's dissertations, projects and internships
- 2010–2020 **Coordinating Professor with Habilitation**, *ISEP – Technical University of Porto*, Porto, Master's Degree in Civil Engineering – 300 ECTS
Director of the Master's Degree (2010–2016) and professor in charge of the courses:
 - Real Estate Appraisal
 - Master's Degree in Civil Engineering – Construction Management option
 - Technology of Structural Connections
 - design of construction processes, pre-fabricated structural systems and their connections
 - Façade Technology / Façade Engineering
 - structural design of façade systems

- 2012–2013 **Visiting Professor (sabbatical leave)**, *The University of Queensland*, Australia, October 2012 to April 2013
Review of the research completed at UQ on the structural characterisation of weathered granite panels; integration of the UQ output with the Porto research on prestressed natural stone panels; meetings with industry and formulation of a collaborative UQ–Porto research plan on the design of thin structural stone veneers.
- 2014 **Visiting Professor (2nd semester)**, *Warsaw University of Technology*, Warsaw
Course “New Methodologies for the Design of Dimension Cladding Stone”: straightforward formulae for computing actions on cladding in the Load and Resistance Factor Design (LRFD) format, to determine the minimum slab thickness in high-rise building façades.
- 2016–2018 **Coordinating Professor with Habilitation**, *ISEP – Technical University of Porto*, Porto, Postgraduate Course in Real Estate Appraisal
Professor in charge of “Financial Mathematics”; “Mixed Method”; “Real Estate Investment Analysis”; “Land Appraisal”; “Real Estate Appraisal – Lease or Acquisition”.
- Frequently acts as examiner in public defences of PhD theses and pre-Bologna Master’s dissertations in Civil Engineering at the University of Minho, the Technical University of Lisbon and the University of Porto, as well as in public examinations for the title of Specialist in Civil Engineering at several Polytechnic Institutes.
- since March 2020 **Coordinating Professor with Habilitation**, *ISEP – School of Engineering, Technical University of Porto*, Porto
Retired (*jubilado*)
- Supervision of Professional Internships, Final Projects and Master’s Theses (2007–2020)
- Supervision of final-year projects (Bachelor’s and Licentiate Degrees in Civil Engineering – pre-Bologna period – ISEP) and of Master’s dissertations, among which:
 - “Study of a prototype model for natural stone panels with post-tensioned elements”;
 - Erasmus programme, “Structural and Economical Optimization of Multi-span Concrete Bridges” – KaHo Sint-Lieven, Belgium;
 - “Experimental study of pull-out systems of dowel anchorages in limestone and marble cladding”;
 - “Experimental study of pull-out systems in kerf anchorages in limestone and marble cladding”;
 - “Study for the Financing of a Real Estate Enterprise”;
 - “Methods for Appraising Residential Units in Horizontal Property for Commercial Purposes”;
 - “Land Appraisal Methods”;
 - “Structural design of glass façades and their supports in aluminium alloy profiles”;
 - “Applicability of Natural Stone in Building Façades – Methods and Techniques”;
 - 3rd-year Bachelor’s seminar: “Project and Structural Design of an Industrial Building in Reinforced Concrete without automatic calculation”;
 - “Steel Structure Project for an Industrial Building – 50 m span roof”;
 - 3rd-year Bachelor’s seminar: “Project and Structural Design of a 5-storey Reinforced Concrete Building without automatic calculation”;
 - “Economic and Financial Feasibility Study of Real Estate Enterprises – Determining the Financing Needs of a Real Estate Investment”;
 - “Study and Design of Structural Systems for Shell Roofs – Application to conical surfaces with straight prestressing in hyperbolic paraboloids”;
 - “Structural and Economic Characterisation of Beam-and-Block Slabs with Prefabricated Ribs”;

“Relative Leasing Advantage: A Blended Method Approach”, Camposinhos, Rui; Lello, José; Zeitschrift für Immobilienökonomie – German Journal of Real Estate Research, Published Online First, <https://doi.org/10.3790/gjrer.2025.1465002>

“Functional Obsolescence in Real Estate Appraisal”, Camposinhos, Rui de S.; The Appraisal Journal – Appraisal Institute, Chicago, IL (*forthcoming*)

○ 2006–2020

Peer reviewer of publications in proceedings of scientific congresses and in journals such as “Journal of Structural Engineering”; “Structural Safety”; “Construction and Building Materials”; “Municipal Engineer”; “Journal of Construction Engineering and Management – ASCE”; “Journal of Finance and Investment Analysis”; “Journal of Facade Design & Engineering”, among others.

Papers in Conference Proceedings and Other Publications

○ 2018

“Real Estate Appraisal – Cost Method – Pseudo-Dynamic Approach” (Avaliação Imobiliária – Método do Custo – Abordagem Pseudo-Dinâmica), Construção 2018 Congress, Porto.

○ 2012

“Seismic Behaviour of Point Supported Glass Panels” – Challenging Glass, International Conference on the Architectural and Structural Applications of Glass, TU Delft, The Netherlands, co-author with R. Delgado et al.

“Spider Glass Behaviour Under Seismic Action” – 15WCEE, World Conference on Earthquake Engineering, Lisbon, September 2012.

“Dimension Stone Cladding Design with Undercut Anchorage”, Global Stone Congress 2012, Alentejo, Portugal, July 2012.

“Natural Stone Panel Specification for a New Façade System”, co-authored with P.M. Amaral and J.C. Lello, Global Stone Congress 2012, Alentejo, Portugal, July 2012.

○ 2010

“Prestressed Façade Stone Panels” – MERSEM 7, Marble and Natural Stone Congress, Afyon, Turkey, co-author with J. Lello.

“Slate Flexural and Anchorage Strength Considerations in Cladding Design”, Global Stone Congress 2010, Alicante, co-authored with Vera Pires, Pedro Amaral and L. Guerra Rosa.

“Prestressing Stone – an Innovative Cladding Façade System”, Global Stone Congress 2010, Alicante, co-author with J. Lello.

“Partial Safety Factors in Dimension Stone Design”, Global Stone Congress 2010, Alicante.

○ 2009

“Façade Cladding of Buildings with Mechanically Fixed Natural Stone” (Revestimento de Fachadas de Edifícios em Pedra Natural Fixada Mecanicamente), II Luso-Brazilian Meeting on Engineering Education and Technology – JLBE 2009, co-author with F. Silva, pp. 587–595, Porto, February 2009.

“Design of Natural Stone Cladding with Dowel Fixing” (Dimensionamento de Revestimentos em Pedra Natural com Fixação por Cavilhas), PATORREB 2009 – 3rd Meeting on Pathology and Rehabilitation of Buildings, co-author, Porto, 2009.

“Pathology in Natural Stone – Staining in Yellow Granite Cladding” (Patologia em Pedra Nat-

ural – Mancha em Revestimento de Granito Amarelo), PATORREB 2009, lead author, Porto, 2009.

○ 2008

“Dimension Stone Cladding Design – Dowel Anchorage Design”, Second International Congress on Dimension Stones, Carrara, Italy, 2008; lead author, co-authored with P.M. Amaral and L. Guerra Rosa (Instituto Superior Técnico) and Vera Pires (FrontWave – Materials Engineering, Taguspark).

“Self-Pressurisable Façades – Part 2” (Fachadas Auto-Pressurizáveis – Parte 2), Engenharia e Vida magazine, n.º 43, Feb. 2008, pp. 40–43.

“Façade Design – Direct Fixing” (Dimensionamento de Fachadas – Fixação Directa), lead author with Vera Pires and Pedro Amaral, Arquitectura e Vida magazine, n.º 90, Feb. 2008, pp. 88–92.

“Self-Pressurisable Façades – Part 1” (Fachadas Auto-Pressurizáveis – Parte 1), Engenharia e Vida magazine, n.º 42, Jan. 2008, pp. 28–33.

“Natural Stone Cladding – Indirect Fixing” (Revestimentos em Pedra Natural – Fixação Indirecta), lead author with Vera Pires (IST) and Pedro Amaral (IST), Arquitectura e Vida magazine, n.º 89, Jan. 2008, pp. 86–91.

○ 2007

“Application of Ornamental Stone Products – Knowledge for Those Who Apply” (Aplicação de Produtos em Rochas Ornamentais), lead author with Pedro Amaral, Engenharia e Vida magazine, n.º 41, year IV, pp. 36–41.

“Pressurisable Façades” (Fachadas Pressurizáveis), 3rd National Construction Congress, FCTUC, University of Coimbra, December 2007.

○ 2004

“Prefabricated Floors – a Structural Performance Quality Assessment Model”, 2nd National Construction Congress, Porto, 2004; lead author, co-authored with A. Serra Neves and Hipólito Sousa (FEUP).

“Design of Glazed Surfaces under Wind Action”, 2nd National Construction Congress, Porto, 2004; lead author.

“Design of the Anchorage of Steel Wires with Headed Ends”, National Structural Concrete Meeting 2004, Porto; lead author, co-authored with J. Azevedo Figueiras and A. Serra Neves (FEUP).

“Verification of Human Comfort Conditions under Induced Vibrations in Lightweight Concrete Floors”, National Structural Concrete Meeting 2004, Porto; lead author, co-authored with Raimundo Moreno Delgado and A. Serra Neves (FEUP).

“Structural Efficiency of Lightweight Floors with Prefabricated Elements”, 46th Brazilian Concrete Congress, Florianópolis, Brazil; lead author, co-authored with A. Serra Neves.

“Beam-and-Block Floor Systems – A Comparative Study”, Socrates Community Action Programme – The European Concrete Standards (Eurocode 2) in Practice, Porto, 2004; lead author, co-authored with Ricardo Santos (ISEP).

○ 2003

“Assessment of the Cracking Limit State in Composite Concrete Floors with Prefabricated Prestressed Ribs”, V Symposium on Concrete Structures, São Paulo, Brazil; lead author, co-authored with A. Serra Neves; published in the Symposium book.

“Assessment of Deformation in Semi-prefabricated Floors with Pre-tensioned Elements”, 45th

Brazilian Concrete Congress, Vitória, E.S., Brazil; lead author, co-authored with A. Serra Neves; published in the Congress book.

- 2002
“Study of Prestressing Wire Anchorage”, lead author, co-authored with J. Azevedo Figueiras and A. Serra Neves, National Structural Concrete Meeting 2002, Lisbon.
- 2001
“Structural and Economic Performance of Lightweight Floors Made with Prestressed Prefabricated Elements”, lead author, co-authored with A. Serra Neves, National Construction Congress 2001, Instituto Superior Técnico, Technical University of Lisbon.
- 2000
“Simulation in the Analysis of Investment in Real Estate Enterprises”, 1st Congress of the Portuguese Association of Engineering Appraisals (APAE), Lisbon.
- 1998
“Quality and Dwelling Houses Financing”, World Housing Congress, I.A.H.S. (International Association for Housing Science), Lisbon.
“Determining Financing Costs in Civil Construction”, Caixa Geral de Depósitos edition, Lisbon.
- 1997
“Application of Simulation Techniques in the Analysis of Financing and Investment in Real Estate Enterprises”, Ordem dos Engenheiros edition, Lisbon, April 1997.
- 1994
“Real Estate Appraisal and Investment Analysis”, ITEC and University of Salford edition, Advanced European Course in Construction and Real Estate Management, Lisbon.
“Real Estate Appraisal and Construction Financing”, Portuguese Journal of Construction Materials.
“Application of the Simulation Techniques in Finance and Investment Analysis to Real Estate Enterprises”, World Housing Congress, I.A.H.S., Porto.
- 1993
“Real Estate Appraisal and Construction Financing”, Meeting on Construction Policy, FEUP, Porto.
“Statistical Methods Applied to Real Estate Appraisal”, Caixa Geral de Depósitos edition, Lisbon.
- 1992
“The Influence of Pre-compression Loss in Beams and Slabs”, co-authored with Professor Manuel de Azeredo, 4th Meeting on Prestressed Structures, Lisbon.
“Risk Analysis and Management of Real Estate Enterprises”, Caixa Geral de Depósitos edition, Lisbon.
